Create a modern, appealing web page for developer2u.de

The platform **developer2u.de** connects companies with experienced software developers.
All developers work on a **project basis** and use **state-of-the-art AI tools and autonomous agents**.
Companies gain fast access to vetted experts — **without long-term commitments**.

Layout & Design

- Use the file data/logo.png as the site logo.

- Scale the logo appropriately to fit both desktop and mobile views.
  Simple and clean design. Thin line rounded boxes around components and buttons.

- Background Color: black

- Use **"JetBrains Mono"** as the main font.

    o Headline, Navgation: #FFFFFF

    o Foreground 1 color: #61b3dc

    o Foreground 2 color: #61dca3

    o Aczent color: #2b4539

- Include **Font Awesome Icons** throughout the interface. (Color: #61b3dc)

- Use React and Tailwind.css on a simple webserver

Responsiveness

- The page must work seamlessly on both **laptop (landscape)** and **mobile (portrait)** devices.

- Layout should adapt responsively using a mobile-first approach or CSS breakpoints.

Top Navigation Bar

- **Left side:**

    o Display the logo.

    o Include a "**Home**" link that always redirects to the start page.

- **Right side:**

    o Add the following navigation entries, each with a matching **Font Awesome icon**:

        ▪ **Developer Pool**

        ▪ **How It Works**

        ▪ **Project Request**

▪ **About Us**

- The same icons used in the navigation should also appear in the **corresponding sections on the page**.

1. Homepage ("Home")

Purpose:
Introduce the platform and the benefits of working with external developers skilled in AI tools.

Contents:

- Hero section: impactful title "Developer2U", slogan: "We bring AI-powered developers to you!", and call-to-action (CTA).

- Benefits of external developers' dynamic allocated to your project.
  Can be extended and list the following:

  - On-demand access to expert developers

  - Increased efficiency through AI agents

  - Developers with extensive project experience

  - No commission fees – direct booking

- Integration of AI tools and autonomous agents to your development projects.
  Can be extended and list the following:
  Top developers. Project-based. AI-enhanced.
  At developer2u.de, you'll find vetted software developers who leverage cutting-edge AI tools and agents to elevate your software projects — fast, flexible, and efficient.

- Modern Development Stack.
  Can be extended and list the following:

  - Modern stacks: React, Vue, Node.js, Vite.js, Tailwind.css, Python, etc.
  - DevOps: Docker, Kubernetes, GitHub Actions, GitLab CI/CD
  - Testing: Playwright, Cypress, Selenium
  - AI/Automation: VSCode+Cline, GitHub Copilot, CrewAI, LangChain
  - Cloud: AWS, Azure, Google Cloud, Vercel
  - Project Tools: Jira, Confluence, Miro

2. Developer Pool ("Developers")

Purpose:
List all active developers with profiles, skills, availability, and areas of specialization.

Developer Profile Content:

There is a file data/developers.json with a list of all Developers:

```
{

  "developers": [

{

  "profile_picture": null,  // URL to image or null if not provided

  "name": "",

  "availability": "",  // Options: "active", "available_soon", "currently_booked"

  "languages": [],  // e.g. ["English", "German"]

  "roles": [],  // e.g. ["Frontend", "DevOps"]

  "tech_stack": [],  // e.g. ["React", "Node.js", "Docker"]

  "ai_tools": [],  // e.g. ["ChatGPT", "Copilot"]

  "verification": {

   "status": true,

   "code": "Verified 525"

  },

  "total_jobs": 0,

  "education": "",  // e.g. "M.Sc. Computer Science"

  "country": ""  // e.g. "Germany"

},

{

...

}

]

}
```

All profile pictures are in the /data folder

In this page provide a nice table of the developers with Profile picture, Name, availability, languages, roles, tech_stack, ai_tools, verification status, Country
When there is too much information. E.g. tech_stack use only the first 5 entries.

Filters :

- **Order by**: Availability, languages, country

- Search for: Technology stack, ai_tools

When a developer was selected form the table, open the profile as modal dialog with all developer information. Nice and well structured. Provide a Button "Request Developer"

3. How It Works ("Process")

Purpose:
Explain how companies can find, contract, and work with developers.

Steps:

1. **Submit request:** Describe your project or development needs.

2. **Matching:** We suggest the most suitable developers.

3. **Kickoff:** Start immediately — you will define your requirements.

4. **Collaboration:** Transparent, AI-assisted communication.

5. **Completion:** Project wrap-up and invoicing.

Example Text:
From idea to success in 3 days.
You describe your needs — we deliver the right developer. No recruiting. No delays.

4. Project Request

Purpose:
Let prospects submit project inquiries or contact a developer directly.

Form Fields:

- Name, company

- Project description

- Required skills / technologies

- Start date, project duration

- AI agent support allowed: yes / no

- Attachment (file Upload)

When a "Submit" button was pressed: Aggregate all data from the form and open an E-mail to info@developer2u.de.
Subject: **"Project Request"**
Content: The form fields

5. About Us ("About developer2u")

Purpose:

We believe modern projects require flexible, AI-powered expertise. That's exactly what we deliver.

Developers aren't resources — they're partners.

We are using modern AI tools during development to provide best quality and fast delivery.
